Python Contents:

1.Introduction to Programming

2.Object Oriented Concepts

3.Introduction to Python

4.Data Types And Variables

5.Statements And Expressions

6.Loops And Arrays

7.String Manipulations

8. List,Functions,Tuples,Numbers

9.Packages

10.Wrapper Classes

11.Difference Between Python And Other Programming Languages

12.Decorators In Python

13.Generatots In Python

14.Exception Handling in Python

15.Packages in Python

16.Dictionaries in Python

17.Recursion In Python

18 .DataBase Concepts In Python

 19.Python Integration

      1.(Connectivity With SqlServer)

      2.(Connectivity With Excel)

Advance Java Contents:

1. MatPlotLib
2. NumPy
3. Scipy
4. Jango
5. Scrapping In Python
6. Data Science Concepts
7. IntroDuction To Machine Learning
8. AI basics
9. Gui Programming With Tkinter

Software :idle,jupyter,Anaconda

All these Topics Contains subtopics which will be studies in Detail and the complete

Curriculum Contains a minimum of 100 Programs Covering all the important topics.

It also contains a project based on three tier architecture.

With Regards
